Instructions for use

Start and stop the vacuum cleaner

Press the switch button once to start the vacuum cleaner.

Press the switch button twice to turn off the vacuum cleaner.

Charging

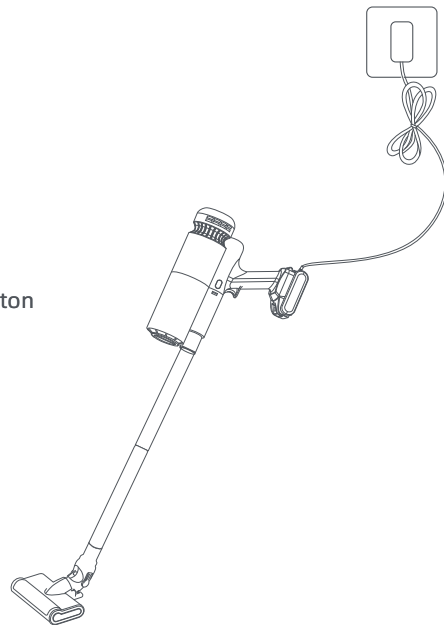

The vacuum cleaner supports direct charging from the power adapter.

Caution:

- The vacuum cleaner will not work while it is charging.
- The battery temperature is high after continuous use in the accelerator position and charging may be slower at this time.

Troubleshooting tips

If the vacuum cleaner does not work properly, please refer to "Troubleshooting" for solutions.

Direct charging with phone adapter

Instructions for use

Precautions in use

1. When sweeping with a handheld Hoover floor or bed brush, some fabric surfaces may become limited or difficult to push. If this happens, it is recommended to use a brush or crevice nozzle when vacuuming.
2. Before vacuuming highly polished floors (wooden floors or polished tiles), check that the floor brush (especially the brush head position) is free from foreign objects that could scratch the floor.
3. Before using the handheld Hoover, make sure that the dust container, HEPA filter are in place.
4. Do not block the exhaust port when vacuuming.
5. For fine dusts such as flour and decorative dusts, use the Hoover only when the dust level is low.
6. Do not use the Hoover to pick up sharp and hard objects, small toys, pins, paper clips, etc. to avoid damage to the Hoover and the floor.
7. Please pay attention to personal safety when using this product to clean dangerous areas such as stairs and windows.
8. Do not place the product on high places such as tables, chairs or lean on other objects to avoid damage caused by slipping or tipping.
9. The movement of the Hoover brush may cause an uneven surface gloss on waxed floors, so wipe the floor with a damp cloth and polish with floor wax.

Cleaning foreign objects

1. When the brush nozzle is working, it may be blocked by inhaling large foreign bodies or entangling too much hair. In this case, it needs to be cleaned up in time.

2. Make sure that the brush nozzle is disconnected from the Body before cleaning the entangled foreign body. This will prevent the machine from being started by mistake and causing personal injury.

Scenarios for the use of accessories

1. Crevice nozzle

Suitable for cleaning small crevices such as doors, windows and stairs.

2. Brush nozzle

Suitable for cleaning sofas, seats, etc.

3. Hose

Suitable for cleaning dust from corners and gaps that are difficult to reach with straight suction nozzles.

4. Filter cleaning brush

Suitable for cleaning dust on the filter screen of vacuum cleaners.

5. Wall hanging

Easy to place and store vacuum cleaner

6. Large blowing nozzle, small blowing nozzle

Suitable for home barbecue, fire, air cushion bed, small kayak, swimming ring, etc.

Care and Maintenance

Product care

1. Please make sure that you use original parts, otherwise you may not be able to enjoy the warranty service.
2. If the filter or suction head is clogged, the fan will stop working intermittently for a few times, please clean the filter and suction head in time.
3. If the product is not used for a long time, please unplug the power adapter after a full charge and place it in a cool and dry place, do not place it in direct sunlight or in a humid environment. Charge the battery at least once every 3 months to avoid over discharging.

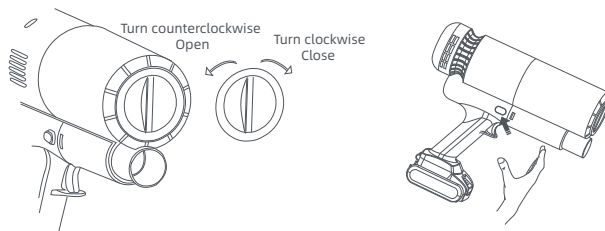

Cleaning the body

Clean the body with a soft dry cloth, do not wash.

Cleaning the dustbin

1. Before cleaning the dustbin, turn off the power supply and turn off the vacuum cleaner. If there is too much dust in the dustbin, the effect of vacuuming will be affected. Please clean the dustbin asap before using it.
2. If you want to dump the garbage, rotate and take out the lid on the edge of the dustbin to pour out garbage directly

3. Press the button of the dustbin to take out the dustbin. Tilt 45 degrees with your hand and take out HEPA
 4. Rinse the dust container with clean water. It is recommended to clean it at least once a month. If the conductive contacts are dirty, wipe them with a soft dry cloth.
- Do not use detergents, polishes or air fresheners to clean the dust container.
 - Do not wash the dust container in a dishwasher etc.

Cleaning of the Filter

***We recommend cleaning at least once a month**

- Before preparing for cleaning, ensure that the product is disconnected from the power adapter and take care not to press the switch to start the machine

1. Press the dustbin bottom to remove the dustbin.
2. Take out the filter .
3. Rinse the filter with cold water until clean. After rinsing, shake the filter dry.
4. The filter shall be air-dried for at least 24 hours to ensure complete drying.
5. After drying, return the filter.

Caution:

Do not wash the filter in a dishwasher, washing machine or dry it in a tumble dryer, oven, microwave or with hot air or open flame.

Basic parameters
